Precipitation	Bimodal

#### Particularities

This private farm is located in center of Magdalena, to the north of Colombia by the Caribbean Sea. The climate is tropical wet with an average temperature of 30° C and the main growing season between June and December. The farm has 31 ha, all own land. The property is running by 4 full time employees. The main feed source is a combination of pasture and concentrates plus home grown hay. There is tractor in use but the farm is well equipped with buildings.
