Average annual precipitation	755 mm
Precipitation	Regular, snow mostly from November to February

Particularities

The farm is a family owned company limited located in mountainous belt of south Czech border at 670-820 m above sea level! This farm is organic and specialised in weaner production The animals are grouped in mobs of about 35 cows Mating period starts mid April and in each of the mobs one breeding bull is running with the cows The source of feed is grass pasture and forage silage, which is complemented by hay from the start of November till the end of April There are no own grains available and purchase organic grains are expensive The farms owns very good machinery equipment, which is typical for weaner producers in this area and which is partially used for landscape maintenance
