Relief	Plains
Elevation (above sea level)	151 m
Soil	Sandy
Climate	Df – wet all seasons
Main growing season	March – June
Average annual temperature	13 °C
Average annual precipitation	800 mm
Precipitation	mainly autumn and spring

Particularities

The farm is a specialised, intensive bull finisher located in the North East of Italy. It employs 2 hired labour units and owners of the farm (family). The farm is strongly specialised in finishing young bulls imported from France. Homegrow feed are maize silage and dry maize, which are the basic rations. Winter wheat is the only additional revenue. Contract labour is used for maize and wheat harvesting. Bulls are kept in covered feedlots with a maximum capacity of 550 heads.
