# Export from Russia by macroregions (detailed), TMT

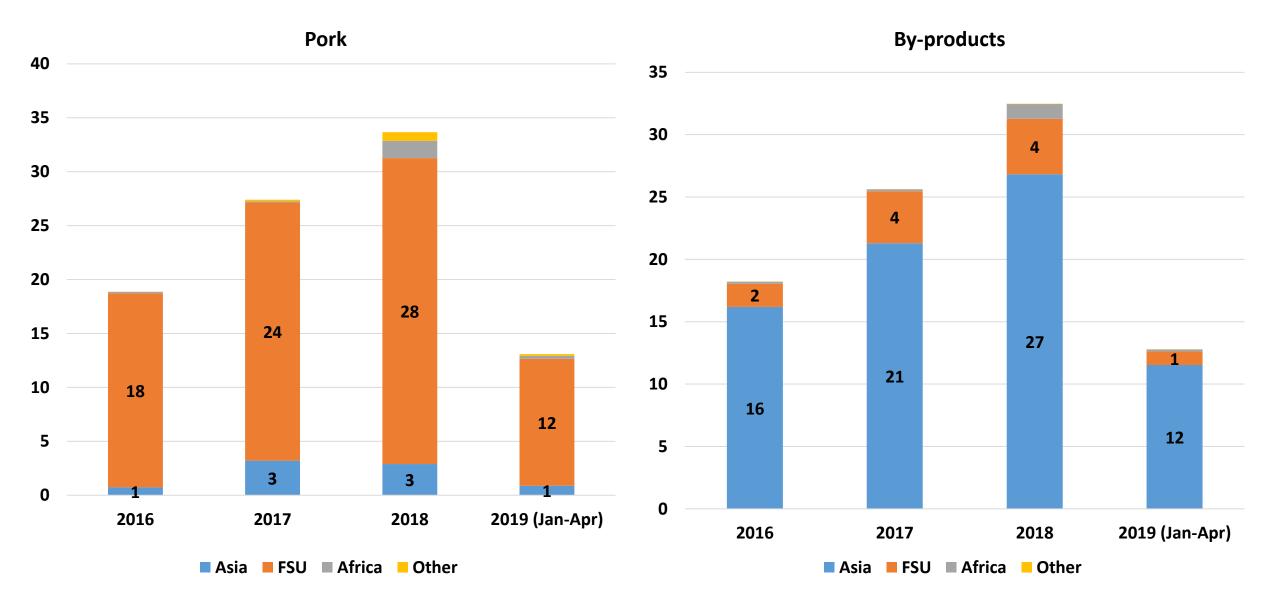

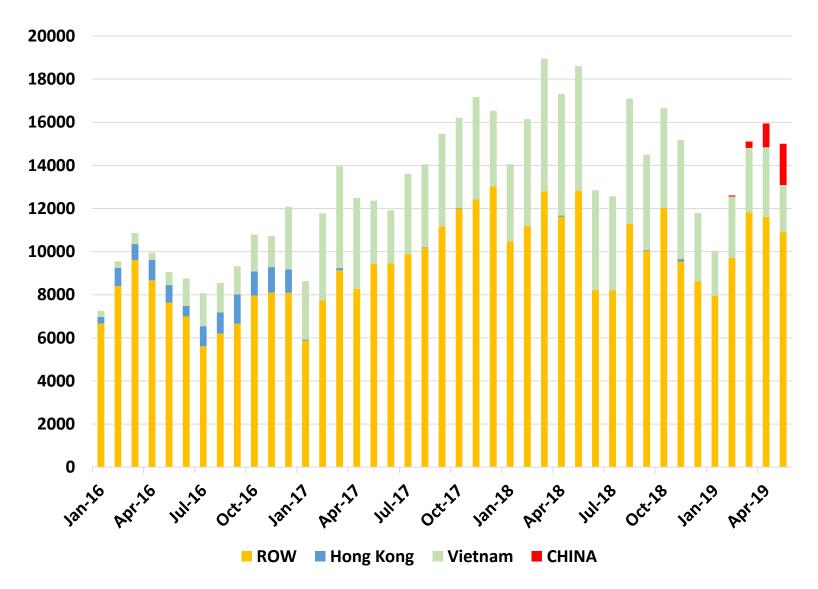

#### Export from Russia by key destinations, TMT

# Recent developments in agri-trade policy in Russia and other countries

...on November 7, 2018, the signing of protocols on mutual deliveries of <u>frozen poultry</u> and dairy products between the Rosselkhoznadzor and the General Administration of Customs of the People's Republic of China took place in Beijing.

**30 poultry meat producers** were **accepted** to export meat and by-products to China.

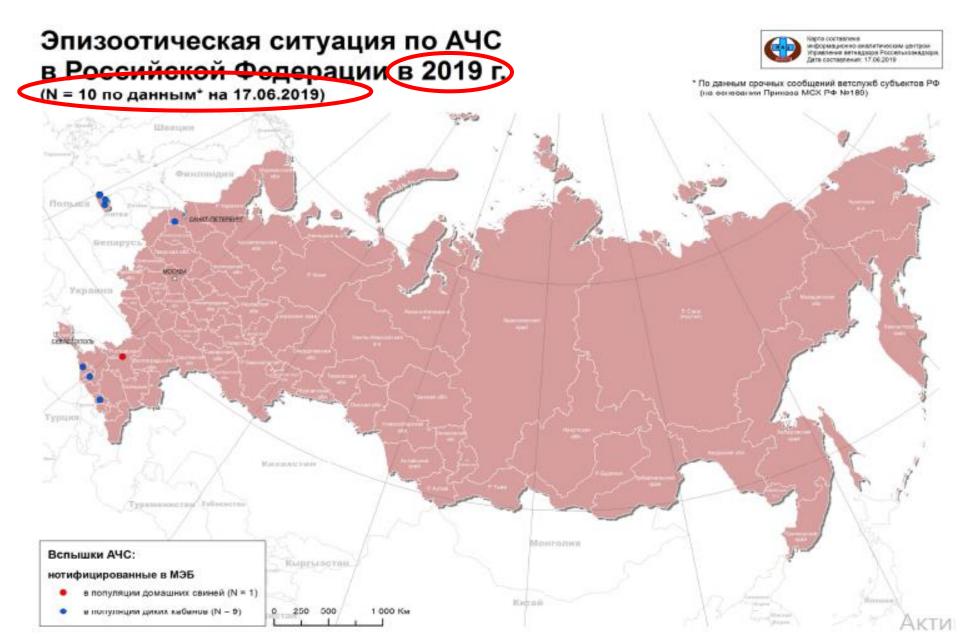

**Export in April 19 amounted 1,1 TMT and 1,9 TMT in May** since the beginning of 2019 (only 5 companies actually shipped to China)

### ASF in Russia: since 2007...

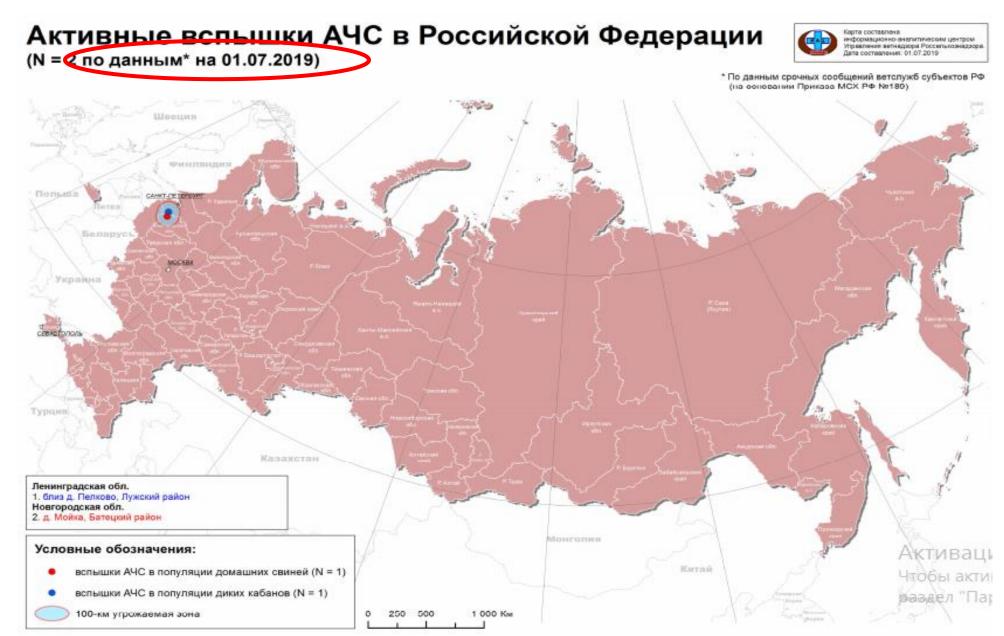

# ASF in Russia: since the beginning of 2019

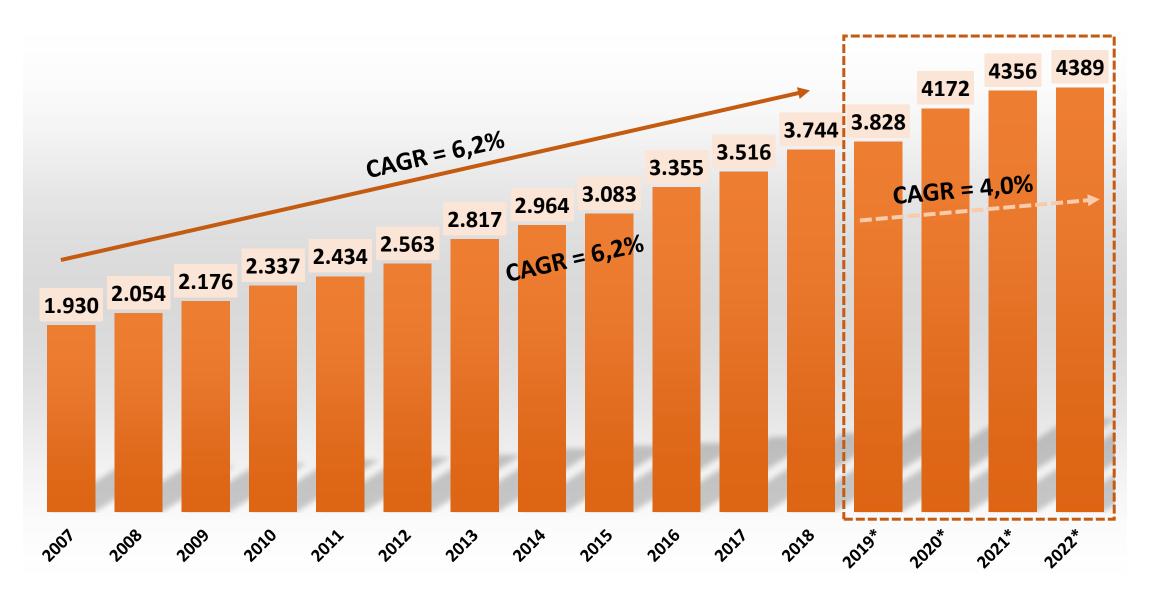

### ASF in Russia: active outbreaks

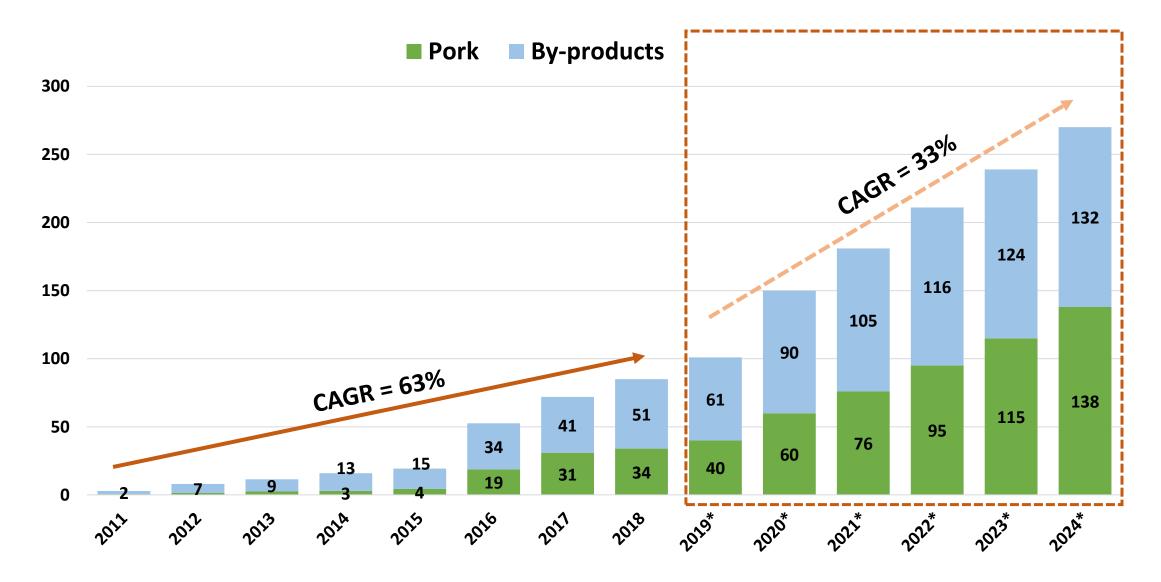

# Projections: pork production in Russia until 2022

Projections: pork and by-products export from Russia until 2024

...

# Key topics to resolve for the successful meat export

- Regionalization (ASF-free regions in Russia have to be accepted for export)
- Veterinary issues (meeting veterinary requirements in importing countries, more control at the farms, faster approval by authorities in Russia)
- Logistics (high costs, development of railway transportation)
- Storage (more capacitates to build near the key outbound points)
- **Price competition** (less prices are needed to compete successfully with majors)
